

what can your
EDUCATIONAL AUDIOLOGIST
do for you?

Perform comprehensive, educationally relevant hearing evaluations and make recommendations to enhance communication access and learning.

Provide training about hearing, hearing loss, and other auditory disorders for school personnel, students, and parents to facilitate a better understanding of the impact of auditory impairments on language, learning, literacy, and social development.

Assist with development and implementation of school hearing screening programs.

Evaluate, make recommendations and/or referrals for students' hearing assistive technology needs, which may include the use of hearing aids, cochlear implants, and other hearing access and assistive technology.

Licensed to ensure proper fit and functioning of hearing aids, cochlear implants, and hearing assistive technology in order to access the educational environment.

Measure classroom noise, evaluate acoustics and make recommendations for improving the classroom listening environment.

Assist in program placement decisions and make specific recommendations to address listening and communication needs.

Facilitate programs for listening and auditory training, communication strategies, and self-advocacy skills for students with auditory needs.

Administer relevant assessments to measure central auditory processing function and make appropriate educational recommendations.

Collaborate with school, parents, support personnel, and relevant community agencies and professionals to ensure delivery of appropriate services.
